WELCOME TO CARRON BATHROOMS.

As the leading bath manufacturer in Europe, Carron Bathrooms are at the forefront of design and manufacturing excellence. With a proud heritage dating back to the formation of the Carron Company in 1759, we are based on the original site on the banks of the River Carron in Falkirk, Scotland. Throughout our history we have built and maintained a reputation for producing first class products.

Our unique blend of experience and innovative designs ensures that we offer an unrivalled range of baths, designed to assist you in making the perfect choice for your bathroom.

Carron Bathrooms has the largest range of aluminium bath moulds in the UK but it's the hand finishing that gives our baths the edge.

We've been at the forefront of modern bath design for over 30 years and as techniques change and new processes emerge, Carron Bathrooms can still be relied on to produce baths with skill and precision, never losing sight of what makes our baths great, craftsmanship.

All our baths go through an 8 stage process before leaving the factory floor. From moulding to packaging, every stage is monitored and finished by hand. This leaves us so confident in our products that we offer a minimum 20 year guarantee on every Carron bath.

1. Our strongest asset, our people (Colin McDonald, Moulding Manager, start date April 1987).
2. Our investment in technology has allowed Carron to push the boundaries of design.
3. Our experience ensures complete conformity throughout the manufacturing process.
4. Skilled operators ensure perfect application on every bath.

Inspired by heritage.

Our designers' research goes much further than the bathroom. Details from our history and surroundings add an extra level of design to our products. With its smooth curves, the Status bath manages to be both practical and timeless.

Right: Status bath available in left hand and right hand options. Modern and practical, it can accommodate a bath screen.

CARRON. MADE IN BRITAIN.

We've always been at the forefront of manufacturing but we've never forgotten our heritage. Every year we bring in new processes and systems that help ensure quality products, but it's our skilled staff that apply the attention to detail. We take pride in the fact that all of our baths are manufactured on the original Carron site in Falkirk, Stirlingshire.

Of course, heritage isn't enough, which is why we have continued to invest in our product range. With the widest range of designs and sizes, Carron is unquestionably the name for baths.

Automated production lines bring cost effectiveness to manufacturing but in our experience, nothing makes up for human skill. That's why you'll find our skilled staff at every stage of the production line. Our unique Carronite™ finishing process is expertly applied and every single Carron product is finished, checked and signed off by hand. It is only by doing this that we can ensure we are happy with each and every product we sell. This quality is reflected in our continued growth and expansion.

With the widest range of designs and sizes, Carron is unquestionably the name for baths.

1. Custom designed processes unique to Carron Bathrooms deliver the highest quality on every bath.
2. An example of Carron's integration of experience and innovation.
3. Every stage of the process combines efficiency and care.
4. With 8 inspection stages, conformity is ensured by our trained operators.
5. Our Falkirk manufacturing plant, Carron's base since 1759.
6. Precision and attention to detail from the outset.

The first and last words in luxury.

Carron Halcyon freestanding baths make a statement. They pronounce attention to detail and they speak of quality. Combined with our custom made, one piece bath surrounds, the Halcyon range will be more than a feature in your bathroom.

Top: Halcyon models available in black, white and red finish.

Design meets comfort.

The Echelon / Equity range has all the design features needed to turn these baths into modern classics, allowing them to hold their own in highly styled bathrooms. Don't think, however, that the Echelon / Equity range is form over function. Warm, smooth curves allow design and comfort to go hand in hand.

Above: Unique integrated filler available on the Echelon bath.

The Urban. A product of its environment.

Taking its inspiration from the urban environment, this bath has an angular look that does not detract from its comfort. At home in modern city apartments and stylish homes alike the Urban is the modernist's choice.

Right: Challenging conventional design, the Urban has been developed to accommodate side mounted taps to provide a complete bathing or showering experience.

Strength & Beauty.

Carronite™ is Carron's unique, patented manufacturing process. We are so confident in the strength and quality of Carronite™ that we offer a 30 year manufacturer warranty.

Comprehensive tests have demonstrated that Carronite™ baths:

Retain Heat

Will retain heat for approx. 30 minutes longer than a standard acrylic bath. This is based on a starting temperature of 55 degrees Celsius and reducing to 45 degrees Celsius.

Amazingly Strong

Demonstrably stronger than standard acrylic baths. Based on measuring the extent to which a cut section of a bath will bend when a 1kg weight is attached to it. A standard bath will bend to 56mm and the Carronite™ bath will bend to 45mm.

Unique Design

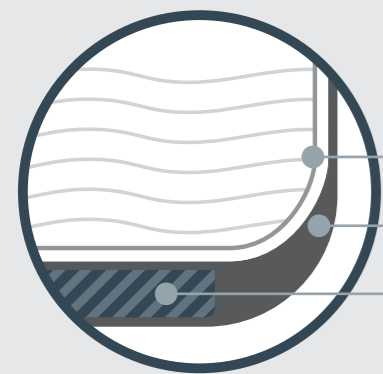

Custom made frame support system designed to cope with the additional weight of the Carronite™ material. Once installed, the bath's stability and rigidity prevent movement, thus offering the perfect solution to the problem of sealing.

Industry Standard

These results are the reason that more industry professionals would recommend a Carronite™ bath over any other currently available.

How does Carronite™ work?

The demonstrable strength of a Carronite™ bath comes from a triple layer reinforcement process. This additional weight means the bath requires to be fitted with a unique frame support system. The combination of the material itself and the frame system ensure the rigidity and stability of the bath.

Acrylic

Carronite™

18mm Baseboard

Acrylic

Warm, durable, high gloss, easy clean finish, formed from 5mm acrylic.

Carronite™

High technology, rigid reinforcement.

18mm Baseboard

Fully encapsulated for total rigidity.

Set temperatures soaring.

Elegant, sophisticated, defined. The Celsius range is based on strong lines and bold features yet never compromises on comfort and luxury. The range covers standard baths, showerbaths, freestanding and the impressive duo, all encompassing the Celsius style.

Right: For the ultimate in feature baths, Carron have developed a granite effect finish exclusive to the Celsius freestanding bath.

Making the most of space.

Not all bathrooms can accommodate a separate shower cubicle but with the Showerbath range from Carron, you can have the comfort of a bath and still get that extra space needed for a luxurious shower, too. Also, with many of our ranges featuring a showerbath option, we have a style to suit any bathroom.

C-Lenda: Low Profile Ergonomic Design.

The Future of Whirlpool Technology

The C-Lenda Whirlpool system is the most technologically advanced system available on today's market. This unique jet system has been designed by Markon in New Zealand and ensures the most comfortable bathing experience. Almost all baths in the Carron range are compatible with this whirlpool system and are made to order by our skilled technicians at our factory in Falkirk.

Right: Haiku with C-Lenda system 3 (includes chromatherapy).

THE C-LEND A SYSTEM:

A worldwide, patented system by Markon combines the quality of today's modern materials with the look and feel of tomorrow's technology, offering the ultimate in comfort and style.

In previous whirlpool baths, the fittings protruded from the bath wall into the bathing area and were prone to build up of soap which was difficult to clean. In the unique C-Lenda design, all fittings are flush with the bath wall, creating a smooth, continuous surface. As well as the visual appeal this offers, the bathing experience is extremely comfortable and all fittings are easy to clean ensuring the stunning look is maintained for years to come. In addition to the sleek jet technology, the C-Lenda operating controls are smooth and easily adjustable.

Every aspect of the C-Lenda technology has been designed with the bather in mind. From the smooth easily adjustable controls and invigorating jet massage performance, through to the super safe suction system – you can be assured you will enjoy the comfort, style and protection you deserve from C-Lenda.

Finishing touches.

We offer a range of practical products to add the finishing touch to your chosen Carron bath. Showerscreens, Carronite™ panels and a wide range of L-Shaped panels. Complete compatibility details are available by contacting us or visiting our website at carronbathrooms.com

Showerscreens

All Carron showerbaths have a custom designed screen available. The Quantum Showerbath has a unique screen option while the more traditional P-shaped showerbaths in the Carron range have the option of a curved screen or a fully enclosed wrap round screen which gives definition to the showering area.

Panels

We offer a range of panels to complete the look of your chosen bath. One piece L-Shaped panels provide an ideal solution, ensuring a flawless finish and removing any unsightly joins between front and end panels.

Carronite™ Panels

Adapting our patented Carronite™ process to our panels offers additional strength and rigidity and gives you peace of mind. Available throughout our range, Carronite™ panels are another example of our continuing focus on innovative and practical design.
